

FLEXO

The Oil-Skimmer with a Chain

**The FLEXO Oil-Skimmer is Made in the U.S.A. and
Features German Engineering**

FLEXO

The Oil-Skimmer with a Chain

Contaminants Within Coolant is Trouble!

Constant leakage of oil from the machine's linear guides, circulating lubrication systems and oily parts causes contamination of the coolant and can lead to frequent production

“Tramp-Oil” creates favorable condition for the grow of bacteria in the coolant and leaves a oil-residue on the machine and parts. The oil residue creates a oil spray effect and reduces the coolant performance and oxygen intake of the coolant.

The Consequences are:

- ◆ Expensive Waste Disposal
- ◆ Bacteria Growth
- ◆ Unpleasant Smell
- ◆ Skin Rashes, Eye and Lung Irritation
- ◆ Poor Cooling Performance, Etc.

Contaminates Within the Coolant is History The FLEXO Oil-Skimmer Removes Floating Tramp-Oil and Particles

Specification (Standard Model):

Mounting: Magnetic Base, Ø 80mm (Ø3.15 in)

Opening: 60 x 60 mm is sufficient (2.36 x 2.36 in)

Drive: Synchronous Geared Motor, 5 Watt

Power: 110VAC / 60Hz

Conveying Elements: Endless Flexible Chain

Safety: Water Resistant

Unit Width: 180 - 235mm (7.1 - 9.25 in)

Unit Depth: 100mm (3.94 in)

Unit Height: 330 - 560mm (13.0 - 22.05 in)

Unit Weight: 3.2 kg (7.05lb)

Immersion Depth: Max. 280mm (11.03in)

Ambient Temperature -5 to +45 C (-23 to +112F)
